

Student Name: \_\_\_\_\_ Student ID#: \_\_\_\_\_

**COUNSELOR RECOMMENDATIONS:**

The North High Engineering program is the only engineering program in USD259 that offers the Airbus Flying Challenge Program where our engineering students work alongside Airbus engineers to build a FAA certified 2 seater airplane each year. Students from outside of the North High feeder pattern are able to receive special transfers to North High so that they can be participants in this exciting program. We are unable to offer busing transportation. The process to get into the program is competitive with GPA, state assessment scores, teacher recommendations, and counselor recommendations being used to select students. All students within the North High feeder pattern will be accepted into the program but the student still needs to complete an application so they can be correctly placed within the program.

This year's applications and recommendations will be completed through Google Forms. The student that gave you this needs a recommendation from you for North High School's Engineering Program. We thank you for taking time out of your busy schedule to fill this form out for your student. This form will take between 5 and 10 minutes to complete.

- To fill out your recommendation form, open a web browser and type in the following url into the address bar: <https://tinyurl.com/engineercounselor>
- Follow the instructions and fill out the form completely.

APPLICATIONS AND RECOMMENDATIONS ARE DUE ON OR BEFORE: **Saturday, JANUARY 21, 2023.**
